

In this document, you can find all
the products of the Green Home.

GREEN HOME CASA VERDE

SAVER SHOWER HEAD

The shower is an area that represents important water consumption within the house, as tidying oneself up is a major water-using activity, which is why a shower system that minimizes water flow, saving between 20 and 30% of the vital liquid, is necessary.

CONTACT
ANFAD

PERSONAL CARE PRODUCTS

The biodegradable shampoo for both hair and skin is made with non-artificial, colorants-and-scent-free aloe vera. Due to its natural properties, it does not irritate the eyes, makes skin dry or alters natural pH levels.

www.sca.com

ELECTRONICALLY-BACKED WATER HEATER

The heater operates with an electronic ignition system, which translates into an important gas-and-water-consumption saver. Because water heats up almost immediately, it is possible to have adequate-temperature water for personal washing and other activities, thus saving important amounts of the vital liquid.

BAMBOO CLOTHES

Bamboo fiber does not cause irritation and soprovokes fewer allergies. It regulates temperature: it is warm during summer and fresh during winter. Plus, it absorbs sweat and humidity four times more than cotton fiber thanks to its micro-holes. It is a breathable fabric: it doesn't stick to your body while exercising or due to heat excess. Bamboo clothes are great as they are also excellent anti-UV-rays garments.

www.ge.com

ENDEMIC PLANT

Species that are native to the region and consume less natural resources, precisely because they are better adapted to the environment. Its recommendable to select endemic plants due to their easy growth and development in their natural environments, and because they dont need extra care.

Scientific name: *Thrinax radiata*
Common name: Florida Pelambrera, Thrinax,
Coast guano, Yuraguano Palm, Canaxan
Origin: Central America, Caribbean, South of Florida

BCC GROWING CONTAINER SYSTEM

The BCC growing container systems are designed and focused on optimum root system development, space utilization, high quality plant production and efficient handling. BCC has a wide range of different growing containers to meet various needs. BCC growing containers are of course produced in high quality plastic that is 100% recycable.

ORGANIC WINE

Reserve wine produced from organic grapes without synthetic fertilizers or chemical pesticides, with regard to the environment.

It stands because of its spectacular ruby red color.

On nose, the wine is notable for its fruity notes, especially sour cherries and mature plums, subtly mixed with pepper-spiced notes. On mouth, the wine starts with sweetness, goes through a fruity expression and ends up with pleasant and persistent tannins.

www.ecologica-mente.com.mx

CLEANERS

The product is certified by Spartan, which means its products are comprised with certain amounts of renewable vegetable and animal resources. Phosphate-free product that is non-toxic, non-polluting, and with no butyl acid or solvents either.

CONTACT
www.goxichemical.com

WASHING MACHINE

Saves up to 120 water liters per load, thanks to its efficient water recycling system, based on cutting-edge technology and design that recycles water flows when in both washing and rinse modes.

CONTACT
ANFAD

VACUUM CLEANER

90% of the vacuum cleaner is recyclable.
56% of package is recyclable.

CONTACT
www.electrolux.com.mx

PHOTOVOLTAIC FILM

A transparent module (from 10% onwards) that generates between 43 and 50 watts of energy. The module losses less energy in wiring and connections, as it works with low-intensity currents.

CONTACT
www.ecovagreen.com

PHOTOVOLTAIC CELLS

Photovoltaic solar panels possess low-density yields and don't produce heat that can be reused. However, these panels are very appropriate for simple rooftop and self-sufficient installations. They reduce fossil fuel-based emissions.

CONTACT
www.kanndas-solar.com

DOMESTIC SOLAR HEATER

A compact thermosiphon equipment for 39 gallons of water to a 122/131°F. It saves between 70 and 80% of fuel, is easy to install, reduces polluting gases and has a 10-year guarantee and 20+ years of lifespan.

CONTACT
ANFAD

FLOOR

Floors made from Spanish natural cork processed in the US. They offer a great variety of designs and styles. Cork is a resistant, organic and high-durability material. Bamboo floors are highly resistant; as a raw material, bamboo enjoys a fast production process and can be easily reused.

CONTACT
www.artificio.com.mx

AIR CONDITIONER

The system works to its maximum capacity from the start, and as soon as the equipment reaches the desired temperature, it softly adjusts the rhythm, without sudden energy bursts. It consumes less energy and provides more comfort to users. It is sustainable on account of its eco-cooling system.

INTERIOR WALL THERMAL INSULATION SYSTEM

- 2-in rock wool or fiberglass thermal insulation
- Metallic post and beam fastener
- 0.5-in thick plaster panel

MASSIVE WALL THERMAL INSULATION SYSTEM

- Substratum
- Adhesive
- Insulation sheet
- Base coat with reinforcing mesh
- Primer
- Finish

THERMAL INSULATION SLAB SYSTEM BASED ON THE BEAMS AND EXTENDED POLYSTYRENE FILLER BLOCK

- Concrete sand finish coat
- Waterproof coating
- Polystyrene sheet
- Concrete and metal reinforcing mesh
- Metallic tie beam
- Extended polystyrene filling block
